# ABOUT US

ELECTRONICS *Supply Co., Inc.*

We are a certified woman owned, small business located in Kansas City, Missouri at 4100 Main Street. We started business in 1952 selling television repair parts but as the industry evolved, so did Electronics Supply. Our primary business today is datacomm/networking products, security products, sound products, and power backup products. In addition, we stock test equipment, sound equipment, wire and cable, tools, and electronic components. In 1989, we built a new facility to accommodate our growing inventory of new products. We currently have 29 employees with over 300 years collective experience in the electronics industry. We have BICSI certified RCDD's as well as an electrical engineer on staff. Our trained and experienced people can help you design video security systems, sound systems, computer networking systems and power backup systems. We attribute our success and longevity to our knowledge, customer service, and large inventory. Our goal is to assist you in any way we can. Please feel free to call us and, as always, we appreciate your business.
